

Women innovators connected

17th April 2008

Hilton Hotel / William St / Glasgow City Centre

09.00 – 18.30

Are you a businesswoman
or female scientist looking to:

- ▶ Improve your networking skills?
- ▶ Find new channels to market?
- ▶ Create more internationalisation opportunities?
- ▶ Start-up or grow your business?
- ▶ License your technology?

Women Innovators Connected is a networking event to help connect you to other women working in science and technology areas in Scotland and around Europe.

Developing networking skills is essential to business development and growing your business and this event will address this issue.

Businesswomen and women scientists and technologists have a key role to play in the future of regional economies. However, it is vital that these “Women Innovators” **gain access to international networks and other like-minded people in Europe**. The **WENETT** project offers Women Innovators the opportunity to learn about cooperating and will offer support services to Women Innovators who want to do business internationally.
